To be clear. We are not yet a member of AAPOR's transparency initiative, but this document was modeled after their disclosure elements and we strive to meet the standards created by AAPOR

1. Who sponsored the survey and who conducted it. If different from the sponsor, the original sources of funding will also be disclosed.	There were no outside sponsors for the survey. The poll was paid for and conducted by Point Blank Political.
2. The exact wording and presentation of questions and response options whose results are reported. This includes preceding interviewer or respondent instructions and any preceding questions that might reasonably be expected to influence responses to the reported results.	See appendix
3. A definition of the population under study and its geographic location.	Registered Democratic and No Party Preference Voters in California who either (1) voted in the last democratic primary, or (2) registered as Democrat or NPP within the last two years.
4. Dates of data collection	February 29th to March 1st
5. A description of the sampling frame(s) and its coverage of the target population, including mention of any segment of the target population that is not covered by the design. This may include, for example, exclusion of Alaska and Hawaii in U.S. surveys; exclusion of specific provinces or rural areas in international surveys; and exclusion of non-panel members in panel surveys. If possible, the estimated size of non-covered segments will be provided. If a size estimate cannot be provided, this will be explained. If no frame or list was utilized, this will be indicated.	The master frame was the California Voter file. From that 54,000 records were pulled. Point Blank Political solicited these 54,000 for responses. Point Blank Political screened these respondents based on registration, party status, and likelihood to vote.
6. The name of the sample supplier, if the sampling frame and/or the sample itself was provided by a third party.	No Third Party.
7. The methods used to recruit the panel or participants, if the sample was drawn from a pre-recruited panel or pool of respondents.	This was a peer-to-peer text-to-online and email-to-online panel.
9. Method(s) and mode(s) used to administer the survey (e.g., CATI, CAPI, ACASI, IVR, mail survey, Web survey) and the language(s) offered.	This was a peer-to-peer text-to-online and email-to-online panel.
10. Sample sizes (by sampling frame if more than one was used) and a discussion of the precision of the findings. For probability samples, the estimates of sampling error will be reported, and the discussion will state	The final actual sample was 1220 voters. Due to weighting the effective sample size was reduced to 549 voters. The 95% confidence interval is +/- 4.1 percent.

whether or not the reported margins of sampling error or statistical analyses have been adjusted for the design effect due to weighting, clustering, or other factors. Disclosure requirements for non-probability samples are different because the precision of estimates from such samples is a model-based measure (rather than the average deviation from the population value over all possible samples). Reports of non-probability samples will only provide measures of precision if they are accompanied by a detailed description of how the underlying model was specified, its assumptions validated, and the measure(s) calculated. To avoid confusion, it is best to avoid using the term "margin of error" or "margin of sampling error" in conjunction with non-probability samples.	
11. A description of how the weights were calculated, including the variables used and the sources of weighting parameters, if weighted estimates are reported.	The survey was weighted based on age, gender, race, and education. Estimates for the population parameters were obtained from a combination L2 Political's proprietary database and polls of the 2016 race.

Appendix:

1. Are you registered to vote in the state of California?
Yes
No [END]

2. How likely are you to vote in the March 3rd democratic primary election?
Very Likely
Somewhat Likely
Somewhat Unlikely [END]
Very Unlikely [END]
Unsure

3. What is your political party affiliation?
Democrat
Republican [GO TO Q6]
Independent or another party

4. If the democratic primary election for President of The United States were held today, for whom would you vote?
Joe Biden
Michael Bloomberg

Pete Buttigieg
Tulsi Gabbard
Amy Klobuchar
Bernie Sanders
Tom Steyer
Elizabeth Warren
Undecided

5.   If the democratic primary election for President of the United States were held today, which of these candidates are you *least* likely to support?
Joe Biden
Michael Bloomberg
Pete Buttigieg
Tulsi Gabbard
Amy Klobuchar
Bernie Sanders
Tom Steyer
Elizabeth Warren
Undecided

6: If the democratic primary election for President of The United States were held today and your choices were between Bernie Sanders and Joe Biden, for whom would you vote?

Bernie Sanders

Joe Biden

Undecided

7: If the democratic primary election for President of The United States were held today and your choices were between Bernie Sanders and Joe Biden, for whom would you vote?

Bernie Sanders

Michael Bloomberg

Undecided

8: If the democratic primary election for President of The United States were held today and your choices were between Bernie Sanders and Joe Biden, for whom would you vote?

Bernie Sanders

Elizabeth Warren

Undecided

9: How worried are you about Coronavirus?

Very worried

Somewhat worried

Not at all worried

Unsure

14.   The following questions are for demographic purposes.
What is your ethnicity?
White or Caucasian
African American
Asian
Latino or Hispanic
Other

15.   How old are you?
18-29
30-39
40-49
50-65
65 or older

16.   What is your gender?
Male
Female

17.   What is your highest educational level?
Some High School, No Diploma
High School Graduate
Some College
College Graduate
Postgraduate

18.   What is your annual income range?
Under $30,000
$30,000 to $49,000
$50,000 to $99,000
$100,000 to $199,000
$200,000 or more

19.   How would you describe the town or city in which you live?
Rural (countryside)
Suburban (between a town/city and the countryside)
Urban (town or city)
